

## Aimsio Job Opportunity | Business Analyst

At Aimsio, we bring the Silicon Valley approach to business innovation in Western Canada. We help field service companies gain control of their field operations. As a fast-growing software company, we are committed to being a key contributor to our local technology community and establishing an innovation hub in Western Canada.

Aimsio's goal is clear: to drive efficiency by creating intuitive solutions to complex problems. Every day, we push the boundaries of the innovation world. To achieve our goals, we have invested in hiring, empowering and challenging a top-tier team with backgrounds in technology, finance, business development, and entrepreneurship.

Are you intrigued yet? Well, learn why you should make Aimsio your daytime home!

1. Work with a team of top talents and mentors – you will be challenged!
2. Get in the groove and play an integral role in building a technology company with exponential growth potential.
3. Voice your opinion and influence! Contribute to pushing boundaries. Make an impact by leading projects and driving the direction of the company.
4. Solve complex problems. Develop initiatives and solutions that drive your career and boost the company's growth.
5. Regular Aimsio Academy meetings, inspired by Talks @ Google, in which guest speakers from technology leaders to politicians share their nuggets of wisdom.
6. Join the movement to grow the local tech community – we are passionate about sharing and paying it forward.
7. Have fun! We organize awesome team activities and have a games room: Xbox, puzzles, foosball, poker tournaments, and even a hammock – in case you need a short snooze to reenergize your day.
8. Enjoy the small little things – all you can drink coffee, tea, and a fully stocked up kitchen.
9. Work hard, play hard mentality with a flexible work schedule. It is a fast-paced, fun environment.

## **Business Analyst**

### **THE ROLE: ARE YOU UP FOR THE CHALLENGE?**

We are looking for a talented technical business analyst to support our clients throughout their lifecycle in the system. This is a cross-functional position that requires coordination with the Sales, Product, and Platform teams. It involves a wide range of activities from scoping the requirements, to writing detailed design documents, overseeing the development, and post implementation support. Our ideal candidate should be a team player with strong analytical skills to understand client needs and how our software can be configured to accommodate them.

### **DUTIES: HOW YOU WILL MAKE A CONTRIBUTION TO OUR TEAM.**

- Work with the sales team to analyze and scope out requirements of new clients
- Critically evaluate information gathered from multiple sources, reconcile conflicts, decompose high-level information into details, abstract up from low-level information to a general understanding, and distinguish user requests from the underlying true needs;
- Help manage relationship with clients
- Analyze and write detailed design documents for select clients
- Configure the solution for new clients using our front-end tools
- Collaborate with the development team to implement custom features and change orders
- Drive projects to successful completion, as defined by the Key Performance Indicators (KPIs) for each client
- Collaborate with the QA team to test new features from an end-user's perspective
- Collaborate with the Customer Support team as a support agent
- Assist in conducting research on software and hardware products to justify recommendations and to support R&D efforts
- Travel throughout the province as required to meet with customers
- Attend daily stand-up meetings as well as weekly sprint planning sessions

## **QUALIFICATIONS: DO YOU HAVE WHAT IT TAKES?**

- BSc in Computer Science or equivalent experience
- Experience defining, documenting, and validating business requirements
- Able to work under pressure, with conflicting priorities in a multiple stakeholder environment
- Excellent communication (written and verbal)
- Experience working in a team-oriented, collaborative environment, as well as ability to work independently.
- Experience implementing software for oilfield service company is a plus
- Knowledge of HTML and Twitter Bootstrap is a plus
- Technical knowledge of MySQL databases and JavaScript is a big plus
- Strong time management and organizational skills to drive projects to completion is a must
- Passionate about user interface design and user experience is a plus

## **HOW TO APPLY: READY TO TAKE YOUR CAREER TO THE NEXT LEVEL?**

Apply now by sending your resume and cover letter telling us why you are the ideal candidate for this position to **[career@aimsio.com](mailto:career@aimsio.com)**
